

I'm talking about people that in 2022 had someone breaking into the house in between Santa Barbara Infrared interviews after forbidding in person interviewing at Millennium Space Company and Santa Barbara Infrared—twice—attempting to extract the names of projects and personnel involved in [automated, optimized, intelligent data collection for cryo electron microscopy]<sup>1</sup> with National Institutes of Health funding and Hughes Research personnel who had implied outside [retracted] in the summer of 2021 that there was not an explicit expiration date on such contractual obligations or nondisclosure agreements—these men expanded to Miami, and they have personally met me in Santa Monica and Palm Beach County—their test is to see what they can offer that is accepted.

When I reject them while dealing with them personally, they get violent.

There are three Sutherlands and (I am not joking) two Anthonies that are working together—with hackers—obviously, nondisclosure is the policy that is here applied, but it is stressed that as they get violent when they are denied LPLA, BA, SRI, etc., access, so too—while questions approach higher offices, open murder is publicly claimed to be the response for the denial of even illegal orders.

They are talking, this very morning, with language that is probably similar: “Why is he still writing? We put two million dollars at his laboratory! Isn’t that what he wanted?”

But did they stop attempting violations of the law?

No.

And did I ever agree verbally or in writing to be part of their faction’s racketeering syndicates?

No, I left, ignored, refuted, or reported them, and so they offered me an apartment in Boynton Beach for LPLA Commonwealth acquisition information to show [you’re no better than us!] but did I not reject it?

Was Rod not fired that week, during the second attempted breach of that set of attempts?

Again: This very morning, they are speaking with language that is probably similar to: “We put two million dollars at his laboratory! Why is he still writing? Isn’t that what he wanted?”

But did they not commit federal bribery on that basis?

And then two million dollars shows up in that exact laboratory—what was really owed was about one hundred times more (one hundred million each in Florida and California would be cheap, considering that they now have Haitians, Jamaicans, and other various Caribbean Islanders and United States civilians, hiding in Mexico and Boynton Beach, involved in trying to “get in on the action” while destroying decades of scientific work involving medical research)—by those who thought to conceal LPLA, BA, CGI, GM, HRL, SBIR, SRI breach attempts, while putting apartments in Del Mar and Boynton Beach next to Kristi Noem’s and Andrew Michael Holness’ telephone numbers—and within a week of it being documented, he is publicly threatening to kill all military servicemen who disobey him, and the politicians that did not urge them to disobey all orders, only illegal orders—while claiming immunity for an insurrection and bribery involving federal funding, both crimes of which carry the penalty of a ban on holding federal office, on the basis of holding federal office!

While claiming immunity for federal bribery and insurrection — both crimes of which punishment includes disbarment from federal office—Trump is now talking about killing anybody that disagrees with him.
